1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-17, drawn to a method for treating pond water, classified in class 210, subclass 602.
- II. Claims 18-31, drawn to a disbursing module and a stack, classified in class 138, subclass 109.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus, such as with a disbursing module that is not elongated with an inlet end and an outlet end coupled to the stack.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
